

the network of career development offices in Europe was established at CareerCon 2010 Vienna

- 84 career organisations from 19 EU-countries + one centre from Canada participated

the next activities of the network are:

- to find an agreement for data exchange
- to install a standardised staff exchange within the network
- to organise CareerCon 2011 in Reykjavik, Iceland

with the next CDOnet newsletter, a questionnaire will collect information in order to realise the planned activities as well as to design the main subjects for the CareerCon 2011

The following questions are about data mapping of prospective graduates. Please not „THE DATA DO NOT INCLUDE NAMES OR BIRTH DATES NOR ANY OTHER PERSONAL INFORMATION“ the mapping is focused on curriculum data such as „subject of studies“, „work experience“, „language skills“ and „speciality of studies“. The collected data should give an overview about how many graduates with a certain professional education are available within a delay of 12 months.

Would your centre agree to map data of graduates to a central data base hosted and controlled by the CDOnet members?

If yes, which data would your centre make available:

- subject of studies
- speciality of studies
- work experience achieved in the past
- foreign language skills
- others? Pls. specify:

- In which format do you store students data? Examples will be given ... (multiple choice)
- In which format can you export specific data fields? Examples will be given ... (multiple choice)
- All enterprise clients of CDOnet members should have access to the data base. Do you agree, that access to the data base for enterprise will be given on a very moderate yearly subscription fee?
- Suggest an amount for the enterprise subscription fee? In €?
- Or should the access be free?

- All entries of each centre will be linked to the centre providing the data. If an enterprise selects profiles from graduates and wants to get in contact, enterprise will be linked to the respective centre.
- Do you agree, to pay a moderate fee for the webspace being the link for your centre?
- If yes, what would be acceptable for you? In €

Exchange of staff within the CDOnet members:

- In order to learn from each other, as well as improve the co-operation within the network, CDOnet would like to install a standardised staff mobility program.
- Do you agree to send you staff to other centres of the network for a limited time?
- If yes, what would be the max. duration of the mobility / exchange? ... in weeks
- Would your centre provide financial support for such mobility?
- Would your centre apply for support within an European project? (Leonardo, Erasmus..)

Pls. register under www.careercon.eu
in order to receive the newsletter
and to register for CareerCon2011 in
Reykjavik, Iceland
